

nursemate

Bio-Nutritional Supplement

2

Guaranteed the most viable probiotic product on the market.

Colostrum

Provides Continuous protection in the gut even after closure. Antibodies and other immune proteins continue to protect the mucosal lining of the gut and stimulate the immune system of the calf.

B Vitamins

Vitamins mainly function as catalysts for reactions within the body. The B family of vitamins provide energy, aid in the normal functioning of the nervous system, and provide healthy skin, blood, and muscle tone in the stomach and intestinal tract.

Probiotics

- We keep them Alive

Nursemate 2 contains high levels of probiotics. Probiotics need to be alive to be fully functional. Just like when you sell livestock - your customer will be much happier if the calf is alive when delivered. Refrigeration ensures potency and stability of probiotic levels; freezing products containing probiotics not only maximizes potency and stability, but further extends the shelf life of the product.

-We keep them Frozen

Sterling Technology buys specific strains beneficial to healthy gut flora. We store them frozen before and after we blend the final nursemate 2 product.

We ship to our colostrum collection location where it is stored frozen. It is then delivered to our producers in a cooler where in can be placed in the freezer on the farm.
